PROFILE SNAPSHOT

- Computer Science graduate focused on data analytics and reporting.
- 4-month analytics training at Tech Mahindra Foundation.
- Projects across sales, HR recruitment, customer data, and NLP.

CORE TOOLS

Microsoft SQL Server
Power BI
Microsoft Excel
Python

ANALYTICS SKILLS

- Data Cleaning
- SQL Querying
- Dashboard Design
- Excel Pivot Tables
- Reporting
- Data Visualization
- Basic Statistics

CERTIFICATIONS

- SQL (Basic) — HackerRank
- Excel Skills for Business — Macquarie University
- ITIL 4 Foundation — Logical Operations
- CompTIA A+ Core 1 — Packt
- Cybersecurity Analyst Simulation — TCS

EDUCATION

B.Tech, Computer Science

Shadan College of Engineering and Technology | 60%

Intermediate - MPC

Iqbalia Junior College | 581 / 600

Class X - CBSE

International Indian School
Jeddah | CGPA 6.6

LANGUAGES

- English - Professional
- Hindi - Native
- Urdu - Native

PROFESSIONAL SUMMARY

Entry-level Data Analyst with a Computer Science background and hands-on training in SQL, Excel, Power BI, and Python. Experienced in data cleaning, dashboard creation, reporting, HR analytics, and business insight generation through training and independent projects. Skilled at converting raw datasets into clear dashboards and reports for decision-making.

PROFESSIONAL EXPERIENCE

Data Analytics Trainee | Dec 2023 - Mar 2024

Tech Mahindra Foundation | Hyderabad, India

- Completed hands-on training in Microsoft Excel, SQL, Power BI, and communication skills.
- Used Excel functions, pivot tables, and charts to analyze and summarize datasets.
- Used SQL queries including filtering, aggregation, joins, and grouping to retrieve and analyze structured datasets.
- Built Power BI dashboards to track trends, and category-wise performance, converting raw datasets into easy-to-understand business reports.
- Improved reporting, presentation, and business communication skills through regular practice sessions.

Human Resources Intern | Feb 2023 - Mar 2023

Aashman Foundation | Remote

- Screened and shortlisted applications for internship hiring drives, gaining exposure to recruitment data workflows.
- Coordinated interview scheduling, candidate follow-ups, and hiring communication across multiple open roles.
- Prepared HR tracking reports and recruitment summaries, connecting HR operations with basic analytics practices.

PROJECTS

Sales Performance Dashboard | Power BI | Excel

- Built an interactive Power BI dashboard analyzing approximately 12 months of sales data across ~4 product categories and ~6 regions, visualizing revenue trends and monthly performance.
- Identified the top-performing region contributing an estimated 30–35% of total revenue, enabling clearer insight in the simulated reporting scenario.

Customer Data Cleaning & Analysis | Excel | Microsoft SQL Server

- Cleaned a customer dataset of ~5,000 records using SQL — removed duplicates, handled null values, and standardized inconsistent fields to prepare data for analysis.
- Wrote aggregation queries using JOIN, COUNT, SUM, and AVG to produce a summary report revealing key patterns in customer distribution and order values.

HR Recruitment Analytics Dashboard | Excel | Power BI

- Designed a recruitment pipeline dashboard tracking ~6 hiring stages across multiple roles, covering applications, shortlists, interviews, offers, selections, and rejections.
- Calculated source-wise conversion rates, finding that one sourcing channel contributed over ~50% of successful hires in the simulated dataset.

Toxic Comment Classification | Python | NLP | Machine Learning

- Built a text classification model using scikit-learn on ~10,000 labeled comments, applying text preprocessing, TF-IDF feature extraction, and Logistic Regression.
- Achieved approximately 85% accuracy on the test set; evaluated using precision, recall, and F1-score to assess performance across imbalanced classes.
